2020	6.0	-2.6											3.2

One year update

The L1 Capital International Fund returned 19.1% net of fees in its first year, outperforming the Benchmark Index by 4.6%, while holding an average 10.8% cash balance. While we are pleased with the initial returns of the Fund, one year is a short period to measure the return of an investment. We have invested in a portfolio of high-quality businesses which we expect will continue to perform well over a five year plus time horizon.

The Fund's businesses hold leading market positions in well-structured industries. These businesses are governed by seasoned Boards and management who we believe will take advantage of uncertainties and their company's strong financial position to strengthen the competitive position of their business and increase shareholder value over time.

Currently COVID-19 (coronavirus) is creating much uncertainty and is materially disrupting global economic activity. Without discounting the potential humanitarian and financial severity of this issue, investing is always full of uncertainties. The Fund's current 13.5% cash balance provides the opportunity to cautiously and selectively take advantage of current market conditions and invest in high quality businesses at attractive valuations with lower risk.

We thank you for your interest in the Fund.

L1 Capital International

L1 Capital International is an independent active manager of global equities. We apply a detailed investment process built on a fundamental assessment of quality and value. We aim to deliver attractive risk-adjusted returns by investing in high quality companies that have favourable cashflow-based valuations in well-structured industries that we understand. Capital preservation over the investment horizon is central to our investment philosophy and process. We view risk as a permanent loss of capital as opposed to volatility in share prices.

Investment Philosophy

L1 Capital International will generally invest in businesses we consider:

- Operate in well structured, growing industries
- Have durable business models
- Have aligned management with a strong capital allocation track record
- Generate growing free cashflow
- Demonstrate an ability to sustain high returns on invested capital
- Management can either reinvest capital at attractive incremental returns and/or return excess capital efficiently to shareholders
- Operate with a conservative balance sheet and funding structure.
